Figure 1 shows various map symbols and their corresponding text labels. The symbols include: Highway (solid line), Secondary Road (dashed line), Jeep Trail/Roadway/Erry (line with cross-ticks), Railroad (line with cross-ticks and a vertical line), Pipe/Power Line (line with cross-ticks and a vertical line), Ridge/Physical Feature (line with cross-ticks and a vertical line), Property/Fence Line (line with cross-ticks and a vertical line), Nonvisible Boundary (dotted line), Stream/Shortline (wavy line), Intermittent Stream (dashed wavy line), River / Lake (wavy line with a horizontal line), Glacier (wavy line with a horizontal line), Modality (text in a blue box), Inset (text in a grey box), and Out Area (text in a grey box).

When international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- 1 A " - " following a place name indicates that the place is coextensive with a MCD. A " - - " indicates that the place is also a false MCD; the false MCD name is not shown.
- 2 This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity, but without numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian high-density population. A nontribal census tract is a census or off-reservation trust lands cross state or county boundaries; the same tribal census tract number may be assigned on both sides of the boundary, and, if so, the constituent single-county census tracts are numbered differently.
- 3 A " - " following a block number indicates that the block number is repeated elsewhere in the block.

All legal boundaries and names are as of January 1, 2000. The boundaries shown on this map are for Census Bureau statistical data collection and tabulation purposes only; their depiction and designation for statistical purposes does not constitute a determination of jurisdictional authority or rights of ownership or entitlement.
